

Interstellar Labs — Company Overview & FAQ

Internal knowledge base · Last updated: June 2026 · Document owner: Operations

Note for demo: This document contains a mix of public facts and realistic sample data for a workshop knowledge base.

Who we are

Interstellar Labs Ltd ("Outta Space Engineering") is a software product studio that builds technologies to help people build great businesses. We design and ship custom software, mobile apps, and web applications, and we incubate our own products for emerging markets.

- **Founded:** 2021
- **Legal entity:** Interstellar Labs Ltd (United Kingdom)
- **Team size:** 24 (engineering, design, product, growth, operations)
- **Website:** <https://interstellarlabs.company>
- **LinkedIn:** <https://www.linkedin.com/company/interstellar-labs>

Mission & values

Mission: Build technologies that help people build great businesses.

Our values:

- **Ship with craft.** Quality is a feature. We sweat the details users feel.
- **Customer in the room.** Every decision traces back to a real user problem.
- **Default to ownership.** Small team, big surface area — everyone owns outcomes.
- **Build for the next billion.** We design for emerging markets first: low-bandwidth, mobile-first, multi-currency.

What we build

Interstellar Labs runs a small portfolio of in-house products alongside client engineering work:

Product	What it does	Status	URL
Flagship	Commerce & operations platform for African SMBs	Live	https://flagship.africa
NovaTickets	Event ticketing and access management	Live	https://novatickets.app
CodeWithChuka			—

Product	What it does	Status	URL
	Developer education & hands-on coding courses	Coming soon	

We also take on **custom software development** engagements — mobile and web applications tailored to a client's needs.

Offices

Milton Keynes (HQ) 36 Havelock Avenue, Milton Keynes, MK10 7NX, United Kingdom

San Francisco 2261 Market Street #4259, San Francisco, CA 94114, United States

The team is **remote-first**, with the two offices used as regional hubs and meet-up points.

Leadership

- **Chuka Ofili — Founder & CEO.** Sets product and technical direction; leads CodeWithChuka. Public talks include "Build with Gemini and Google's generative language models."
- **Head of Engineering** — owns delivery across Flagship and NovaTickets.
- **Head of Product** — owns roadmap and discovery.
- **Head of Operations** — owns finance, people, and partnerships.

Frequently asked questions

Q: What does Interstellar Labs do? We build software products and provide custom engineering services. We run our own products (Flagship, NovaTickets, CodeWithChuka) and partner with startups and enterprises on bespoke builds.

Q: Where are you based? We're remote-first with hubs in Milton Keynes (UK HQ) and San Francisco (US).

Q: What markets do you focus on? Emerging markets, with a strong focus on Africa — reflected in products like Flagship (flagship.africa).

Q: How do I get in touch about a project? Email hello@interstellarlabs.company or reach out via our LinkedIn page. Engineering partnership enquiries are reviewed weekly.

Q: Are you hiring? We hire opportunistically for senior engineering, product, and design roles. See the People & Culture handbook for how we work.

Q: How is the company structured legally? Interstellar Labs Ltd is incorporated in the United Kingdom. The US presence operates as a regional office.
